CAUTION

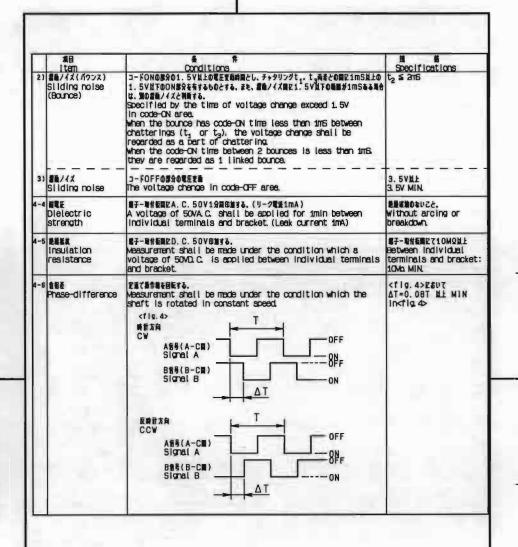

Regardless of the suggested applications of these products being introduced in the specifications, when using them for equipment and devices requiring a high degree of safety, respective manufacturers will please preserve safety of the planned equipment and devices by providing necessary protective circuits and redundancy circuits and reconfirm if safety is being duly preserved.

Products being introduced in the specifications have been designed and manufactured for applications to ordinary electronic equipment and devices such as the AV equipment, electric home appliances, office machines and communications equipment. Consequently, when employing these products for applications requiring a high degree of safety and reliability such as the medical equipment, aviation and aircraft equipment, space equipment and burglar alarm equipment, the using manufacturers will please thoroughly study the proprieties of these products for the planned applications.

Although we are exerting our best efforts to maintain the quality of these products, we cannot guarantee that they will never cause short circuiting and open circuitry. Therefore, when designing an equipment or device with which the priority is given to the safety, you will please carefully study the influences to the whole equipment of a single function failure of Potentiometers and Encoders in advance to make out a fail-safe design providing.

- 9. その他、取扱い上のご注意 PRECAUTIONS IN USE
- 9-1. 保管は高温、多型の地所及び高会性力、ス中を避けて下さい。

During operation storage in high temperature and humidity .and in corrosive gas . should be avoided

9-2. エンコータ'-のハ'ルスカウント処理の設計とおいては動作スピ'ート', サンフ'リンク'タイム, マスキンク'タイム等と 注意し、実表確認の上等使用願います。

In case of pulse count process design, operational speed, sampling time, and masking time etc should be taken into the consideration.

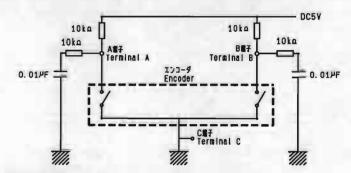

Please check above matter at first on your circuit for the secure reason.

9-3、本製品はクリック企置にてA相はOFF状態で空定となりますので、ソフト設計時A相基準で設計順います。

A phase should be design criterion prior to 8 phase. Because A phase has steady off signal at detent position.

9-4、エンコータ*ーのハ*ルスカウント処理の回路は下因のフィルターをいれることを推奨します。

For your pulse count design, it should be considered to add C/R filter on your circuit shown as below.

9-5. 本製品の本体と直接水分がかかりますと、ハールス波形に異常が免生する可能性がありますので、 製品に直接水分がかからないよう配慮順います。

Care must be taken not to expose this product to water or dew to prevent possible problem in pluse output wave form.

9-6. 医療用機械、器具への本製品の御使用はお避け下さい。

Please avoid to medical instrument because this encoder is audio use.
